## OMNIPLEX SOFTWARE UPGRADE V1.6.0

Dear Plexon Friends and Family,

Great news – the website is back up and fully functional! We apologize for any inconvenience this may have caused. Hopefully all of our American customers were enjoying the Independence Day holiday week, and as a result were unaffected. With [www.plexon.com](http://www.plexon.com) live once again, we are eager to announce the availability of the newest OmniPlex® software release, and the upcoming events in Europe.

### OMNIPLEX SOFTWARE RELEASE 1.6

The OmniPlex V1.6.0 installers are now available and include executables, device clients and a change log dated 6/25/2012, and the release notes. Please be sure to read the release notes. Check out the added support for a 32 channel auxiliary analog input, the enhanced support for stereotrodes and tetrodes, and much more. The XP version of the release is a traditional Setup executable, while the Windows 7 version is a zip folder that must be unzipped to a like-named folder on your PC. The batch file inside the new folder must be run as administrator to perform the installation correctly. The new release can be found on the Plexon website within the Product, Systems, OmniPlex page under the Related Documents tab, then Downloads, or more specifically at: [www.plexon.com/product/OmniPlex.html#Related](http://www.plexon.com/product/OmniPlex.html#Related)

### JULY EUROPEAN CONFERENCES

We look forward to seeing many of you, this week at the International Meeting on Substrate-Integrated Microelectrode Arrays (MEA) in Germany, and immediately following at the Annual Meeting of the Federation of European Neuroscience Societies (FENS) from July 14–18 in Barcelona, Spain. Thank you to all who stopped by to talk during our conference appearances in June.

Lastly, Plexon is having a great year, and as a result we continue to seek excellent candidates for our customer facing roles such as sales, product development and technical support to name a few. So, if you love neuroscience research and would enjoy working with the most prestigious research labs around the world, you are invited to email me at [stacie@plexon.com](mailto:stacie@plexon.com).

If you have any questions or would like to explore Plexon's offerings, please feel free to contact us at [info@plexon.com](mailto:info@plexon.com) or via our main phone number **+1 (214) 369-4957**. We wish you a great rest of the week, and hope to visit with you in person soon.

Stacie Hyatt  
VP, Sales and Marketing
