WHAT'S NEW AT SFN 2012

WHAT'S NEW AT SFN 2012

Neuroscience 2012 is only days away now, and the Plexon team can hardly wait. We have so many new innovations and product advances to share – many of which you have directly influenced! Here are some of the highlights:

- Fully expanded family of DigiAmp™ amplifiers for the OmniPlex® System: 16, 32, 48, 64, 128, 192 and 256 channels.
- Enhanced online sorting and autosorting algorithms for the OmniPlex System.
- A full spectrum of seven PlexBright™ LED modules for optogenetic stimulation.
- New software driven PlexBright 4 Channel Controller including a user SDK, further expanding the line supporting optogenetics.
- CinePlex's entirely new Behavior Recognition Option enabling posture-defined behavior identification. Sophisticated advancements to color tracking within the CinePlex Tracking Option setting a new industry standard.
- New stimulation functionality for the BioCAM4096 High Density MEA system, and more.

SAVE THE DATE

Mark your calendars for the 2013 Plexon Neurophysiology Workshop: April 29 – May 2, 2013 in Dallas, Texas. Learn why last year's attendees ranked the hands-on workshop 9 out of 10 when asked if they would recommend it to colleagues. More information coming soon program.

PLEXON AT THE NEUROJOBS CAREER FAIR

Interested in a neuroscience career working with world class labs around the world? Stop by the Plexon table at the Neuroscience 2012 NeuroJobs Career Fair on Saturday, Oct. 13.

UPCOMING EVENTS

If we miss you at Neuroscience, you can catch us at these upcoming meetings:

The GDR Multi-electrodes Arrays and Signal Processing in Neural Networks Meeting hosted in Marseille, France on October 25-26.

The 4th International Conference on Neuroprosthetic Devices (ICNPD) in Freiberg, Germany November 19-20.
